PRIYANKA KANOJIA

+1-617-606-8130 | kanojia.p@northeastern.edu | linkedin.com/in/priyanka-datascience | github.com/priyankakanojia36 | Boston, MA

EDUCATION

Northeastern University, Boston, MA — Aug 2025 – Expected Jun 2027
Master of Professional Studies in Analytics | **Concentration: Applied Machine Learning** | GPA: 3.5/4.0
Coursework: Machine Learning, Big Data Analytics, Data Warehousing & SQL, Predictive Analytics, Probability & Statistics
ML Focus: Fundamentals of AI, AI System Technologies, Data Governance & Responsible AI

Shree L.R. Tiwari College of Engineering, Mumbai, India — Aug 2013 – May 2017
Bachelor of Engineering in Information Technology

TECHNICAL SKILLS

Languages:	Python (Pandas, NumPy, PySpark), SQL, R, Java, Swift
Data Engineering:	ETL/ELT Pipelines, Apache Spark, Apache Kafka, Apache Airflow, Data Modeling, Data Validation
Cloud & Storage:	AWS (S3, EC2, Lambda, Redshift, Kinesis), Snowflake, BigQuery, Databricks
Databases:	PostgreSQL, MySQL, SQL Server, MongoDB, SQLite, DynamoDB, Redis
DevOps & MLOps:	Docker, Git, GitHub, CI/CD, REST APIs, Linux/Bash, MLflow, JIRA
Visualization:	Tableau, Power BI, Matplotlib, Seaborn, Advanced Excel

PROFESSIONAL EXPERIENCE

Product Manager, Data & Analytics | **InfowanHR** | Mumbai, India — Jun 2023 – Aug 2025

- Reduced **data preprocessing time by 60%** across the analytics team by designing **automated ETL pipelines in Python and SQL** that consolidated **5+ data sources** (CRM, billing, product usage) into a unified, query-ready data layer
- Drove **40% revenue growth** as validated by **A/B tests** on pricing tiers by building **SQL-based segmentation models** and **12+ Tableau dashboards** that improved **cross-functional decision visibility by 35%**
- Increased **customer lifetime value by 25%** as measured by quarterly retention metrics by developing **predictive churn models in Python (Scikit-learn, Pandas)** trained on behavioral and usage data from **10K+ accounts**
- Eliminated **8 hrs/week of manual reporting** for executive stakeholders by building **scheduled SQL pipelines** with **data validation checks** and automated refresh workflows feeding **Tableau and Excel dashboards**

Senior Business Analyst | **Unacademy** | Bangalore, India — Feb 2021 – May 2023

- Reduced **executive time-to-decision by 30%** as measured by C-suite feedback by building end-to-end **SQL data models** and interactive **Tableau dashboards** serving daily business reviews
- Improved **user engagement by 20%** as measured by session depth metrics by identifying funnel drop-off points through **cohort analysis and behavioral tracking in SQL** across **1M+ interactions**
- Enabled **executive strategic planning across 6+ verticals** as adopted by the COO's Office by designing and maintaining a **KPI tracking framework** with automated **SQL pipelines** and **Tableau reporting**

Business Analyst | **Redseer Strategy Consultants** | Bangalore, India — Feb 2020 – Dec 2020

- Identified **$10M+ revenue potential** for 2 market verticals by building **quantitative research models in Python and Excel** using user segmentation and competitor benchmarking
- Delivered **GTM strategies for 5+ enterprise clients** across 4 industries by building **dynamic forecasting and market-sizing models** with automated data collection workflows

Senior iOS Developer | **Nimap Infotech | NODD | Picostone** | Mumbai, India — May 2017 – Dec 2019

- Reduced **app crash rates by 40%** across **7 iOS apps** by redesigning **data flows** and building **automated testing pipelines**
- Improved **code quality across 4 junior developers** by establishing **CI/CD pipelines, Git workflows**, and architecture standards

PROJECTS

CascadeWatch:ML-Powered Crypto Liquidation Cascade Predictor | Python, XGBoost, Scikit-learn, AWS, Airflow, Streamlit Mar 2026

- Achieved **AUC-ROC of 0.7229** with **3.8-hour average lead time** before cascade onset by engineering a **5-model ensemble** (XGBoost, Isolation Forest, Gradient Boosting, Cox Survival, Fear Index) on **24,123 hourly records** across BTC, ETH, SOL ingested from **5 decentralized exchange APIs** with **19 engineered features**
- Deployed end-to-end automated pipeline on **AWS (S3, DynamoDB, SNS)** with **Airflow DAG** for hourly scoring, on-demand live refresh via **API calls to DynamoDB**, and a **4-page Streamlit dashboard** surfacing real-time ensemble risk scores (0–100) with alert notifications

Real-Time Brain Signal Processing Pipeline | Python, WebSocket, NumPy, Signal Processing — Jan 2026

- Achieved **3rd place** at Precision Neuroscience Brain Storm Hackathon (Microsoft NERD Center) by engineering a **real-time WebSocket ingestion pipeline** processing **1,024-channel neural array** data at **sub-100ms latency**
- Reduced signal noise by **40%** as measured by spectral power clarity by implementing **bandpass filtering, FFT-based spectral analysis**, and **neural hotspot detection algorithms** on live EEG streams

Customer Churn Prediction Pipeline | Python, Scikit-learn, Pandas, Matplotlib — Mar 2026

- Achieved **80.7% accuracy** and **0.842 AUC-ROC** on **7,043 records** by building a **classification pipeline** using **Logistic Regression and Random Forest** with EDA, feature engineering, and SMOTE oversampling
- Identified **top 5 churn drivers** through **feature importance analysis**, producing actionable recommendations to reduce churn by **15–20%**

CERTIFICATIONS & LEADERSHIP

Certifications: Foundations of Responsible AI (Northeastern) | Google Data Analytics (Google) | Product Management (Nextleap)
Awards: Employee of the Quarter, Unacademy (2022), Recognized for driving high-impact analytics initiatives
Leadership: Head of Training & Placement Cell, Led recruitment ops, coordinating with 20+ companies for 500+ students
